SALESFORCE CPQ ENVIRONMENT ASSESSMENT REPORT

Current State Configuration & Usage Analysis

Field	Value
Client Name	Assessment Client
Salesforce Org ID	00D3x000001AjYCEA0
Environment	Production
Assessment Date	2026-03-31
Assessment Period	Dec 31, 2025 – Mar 31, 2026 (90 Days)
CPQ Package Version	232.2.0
Adv. Approvals Version	v232.2.0
Document Version	1.0
Report Generated By	RevBrain CPQ Assessment Tool v1.0
Classification	Confidential

Generated by RevBrain CPQ Assessment Tool

1. Scope & Methodology

Audience: This report is designed for review of current-state CPQ complexity prior to planning.

1.1 Assessment Scope

This report provides a current-state assessment of the Salesforce CPQ environment. The following areas were assessed:
CPQ configuration objects (products, bundles, options, constraints, attributes)
Pricing rules, discount schedules, and custom scripts
CPQ package settings and plugin configuration
Quote templates and document generation
Advanced approval rules and workflows
90-day transactional usage patterns and trends
User behavior and adoption metrics
Discount and override patterns
Data quality and field completeness
Technical debt indicators (dormant configs, duplicate rules)
Custom code: Apex, triggers, flows referencing CPQ objects
Complexity scoring across 5 weighted dimensions
Quote lifecycle and integration touchpoints

1.2 Methodology

Metadata Extraction: CPQ configuration metadata extracted via Salesforce REST, Tooling, and Metadata APIs.
Usage & Behavior Analysis: SOQL queries extract 90-day transactional data including quotes, quote lines, orders, and user activity.
Data Quality Assessment: Automated analysis of field completeness, orphaned records, and duplicate detection.
Custom Code Scan: Identification of Apex classes, triggers, and flows referencing SBQQ objects via namespace scan.
Complexity Scoring: Fixed weighted model (see Section 2.3) normalized against benchmark ranges.
⚠ **Low activity detected in assessment window (23 quotes, 1 active users). Some metrics may not be statistically meaningful.**

1.3 Data Confidence Levels

Level	Label	Definition
★★★	Confirmed	Directly extracted from Salesforce metadata or SOQL query.
★★	Estimated	Derived from available metadata with reasonable inference.
★	Partial	Based on incomplete extraction or sampling.
—	Not extracted	Extraction not attempted or collector did not produce results.

2. Executive Summary

2.1 Key Findings

#	Finding	Detail	Confidence
1	**Custom Quote Calculator Plugin (QCP) active: q2cJSPSP5ALEX**	5 custom script(s) with JavaScript-based pricing logic injected into every calculation. This fundamentally changes the complexity profile.	Confirmed
2	**20 active price rules and 37 active product rules detected**	Heavy rule density indicates significant business logic encoded in CPQ configuration. Pricing logic concentrated in business-specific rules.	Confirmed
3	**Multi-currency enabled**	The org uses multi-currency pricing. Field mappings and currency handling require verification.	Confirmed
4	**67 Apex classes reference CPQ objects**	Substantial custom code dependency suggests significant customization beyond standard CPQ configuration.	Confirmed
5	**176 products extracted across 21 families with active products**	Product catalog spans a diverse range of families including Software, Other, Usage, Services, Bundle, and more.	Estimated

2.2 Complexity Scores

Overall Complexity	27/100
Configuration Depth	28/100
Pricing Logic	35/100
Customization Level	32/100
Data Volume & Usage	21/100
Technical Debt	10/100

Scores are directional indicators of relative complexity, not absolute measures.

2.3 Scoring Methodology

Dimension	Weight	Score	Drivers
Configuration Depth	25%	28/100	Product catalog size, bundle nesting, option constraints, config attributes *Score reflects 179 products, 76 bundle-capable products, and 475 product options. High bundle density increases configuration complexity.*
Pricing Logic	25%	35/100	Price rules, discount schedules, custom scripts (QCP), contracted pricing *Score reflects 28 price rules, 22 discount schedules, and 5 custom script(s) (QCP). QCP presence significantly elevates pricing complexity.*
Customization Level	20%	32/100	Apex class count, trigger count, flow complexity, code dependencies, custom fields, validation rules *Score reflects 67 Apex classes, 5 triggers, and 13 flows referencing CPQ objects. Substantial custom code dependency detected.*

Dimension	Weight	Score	Drivers
Data Volume & Usage	15%	21/100	Quote volume, line count, user adoption, discount patterns *Score reflects 23 quotes in the 90-day assessment window. Low volume — some metrics may not be statistically meaningful.*
Technical Debt	15%	10/100	Inactive price rules, stale/test rules, duplicate discount schedules, dormant products *Score reflects 3 dormant products, 8 inactive price rules, 1 inactive product rules, 3 stale/test rules, 11 duplicate discount schedules. Multiple debt categories indicate cleanup opportunity.*

3. CPQ at a Glance

Data confidence summary: approximately 92% Confirmed, 6% Estimated, 2% Partial.

Product Catalog

Metric	Value	Conf.
Products Extracted	**176**	Estimated
Bundle-capable Products	**76**	Confirmed
Price Books	**N/A**	Confirmed

Pricing & Rules

Metric	Value	Conf.
Price Rules (Active)	**20**	Confirmed
Product Rules (Active)	**37**	Confirmed
Discount Schedules	**~22**	Estimated
Custom Scripts (QCP)	**5 Detected**	Confirmed

Quoting (90 Days)

Metric	Value	Conf.
Quotes Created	**6**	Confirmed
Quote Lines	**73**	Confirmed
Avg Lines / Quote	**3.2**	Confirmed

Users & Licenses

Metric	Value	Conf.
CPQ Licenses	**345**	Confirmed
Active Users (90d) (Estimated)	**1**	Estimated

Automation & Code

Metric	Value	Conf.
Active Triggers	**5**	Confirmed
Active Flows	**44 total (13 CPQ-related)**	Confirmed
Validation Rules	**25**	Confirmed

Technical Debt

Metric	Value	Conf.
Dormant Products	**3**	Confirmed
Inactive Price Rules	**8**	Confirmed
Inactive Product Rules	**1**	Confirmed
Stale/Test Rules	**3**	Confirmed
Duplicate Discount Schedules	**11**	Confirmed

Feature Utilization

Metric	Value	Conf.
Product Bundles	**Active Usage**	Estimated
Discount Schedules	**Active Usage**	Estimated

Metric	Value	Conf.
Custom Scripts (QCP)	**Active Usage**	Estimated
Quote Templates	**Configured**	Estimated
Advanced Approvals	**Detected / Unverified**	Estimated

4. CPQ Package Settings

4.1 Installed Packages

Package	Namespace	Version	Status
Salesforce CPQ	SBQQ	232.2.0	Active
DocuSign eSignature	dsfs	Detected	Active

4.2 Core CPQ Settings

Setting	Value	Notes	Confidence
Multi-Currency	**Enabled (AUD, GBP, EUR, NZD, USD)**	Multi-Currency: Enabled (AUD, GBP, EUR, NZD, USD)	Confirmed
Quote Line Editor	**Enabled**	Quote Line Editor: Enabled (QLE fields detected on Quote object)	Confirmed
Contracted Pricing	**Enabled**	Contracted Pricing: Enabled (ContractedPrice object exists)	Confirmed
Subscription Proration	**By Subscription End Date**	Subscription: Enabled (Contracting: By Subscription End Date)	Confirmed

4.3 Plugins

Plugin	Status	Notes	Confidence
Quote Calculator Plugin (QCP)	**Active**	Active — 5 custom script(s) detected via SBQQ__CustomScript__c: q2cJSPSP5ALEX, q2cJSQCP, qtc_Debugger, Q2CBundleSpecific, q2cJSPSP	Confirmed
Electronic Signature	**Active**	Active (DocuSign) — document signing integration detected.	Confirmed
Payment Gateway	**Not Configured**	Not Configured — no payment processing via CPQ detected.	Confirmed
Document Store Plugin	**Not Configured**	Not Configured — standard document storage in use.	Confirmed
External Configurator	**Not Configured**	Not Configured — standard CPQ configurator in use.	Confirmed
Recommended Products Plugin	**Active**	Active — Apex implementation detected: ProductRecommendationPluginRevCloud	Confirmed

5. Quote Lifecycle

The following lifecycle is derived from detected configuration patterns. Step sequence and frequency are inferred from metadata and have not been verified through direct process observation.

Lead qualified → converted to Account, Contact, Opportunity.

Sales Rep creates Quote from Opportunity.

Quote Line Editor: products added, bundles configured with nested options. Product rules enforce selection and validation constraints.

Pricing engine executes: price rules calculate adjustments, discount schedules apply tiered discounts, QCP custom JavaScript injects additional pricing logic.

Approval routing via Advanced Approvals (sbaa) — multi-level chains with condition-based routing.

Quote PDF generated from configured templates → DocuSign envelope created for e-signature.

Quote accepted → Order auto-created.

6. Configuration Domain Analysis

6.1 Product Catalog

Category	Active	Inactive	Quoted 90d	% Quoted	Conf.
Software	38	1	6	15%	Confirmed
Other	5	0	0	0% (0 of 5)	Confirmed
Usage	5	0	1	20% (1 of 5)	Confirmed
Services	26	0	1	4%	Confirmed
Bundle	8	1	0	0% (0 of 9)	Confirmed
Hardware	48	0	0	0%	Confirmed
None	2	0	0	0% (0 of 2)	Confirmed
Software Add-On	6	0	0	0% (0 of 6)	Confirmed
Software Licenses	2	1	0	0% (0 of 3)	Confirmed
Software Support	2	0	0	0% (0 of 2)	Confirmed
Professional Services	4	0	0	0% (0 of 4)	Confirmed
COBRA	8	0	0	0% (0 of 8)	Confirmed
HRA	1	0	0	0% (0 of 1)	Confirmed
HSA	1	0	0	0% (0 of 1)	Confirmed
FSA	3	0	0	0% (0 of 3)	Confirmed
Notional	1	0	0	0% (0 of 1)	Confirmed
Commuter	2	0	0	0% (0 of 2)	Confirmed
Subscription Device	1	0	0	0% (0 of 1)	Confirmed
Insurance	5	0	0	0% (0 of 5)	Confirmed
Commercial	2	0	1	50% (1 of 2)	Confirmed
Residential	6	0	1	17% (1 of 6)	Confirmed

16 of 21 product families show zero quoting activity in the 90-day window — including Hardware, Bundle, COBRA, and others. This may indicate dormant catalog segments, seasonal patterns, or a narrow active use-case.

6.2 Price Rules

20 active of 28 total

20 of 28 rules active. 5 high-complexity (4+ eval events). 8 inactive rules, 2 stale/test flagged as technical debt.

Rule	Description	Complexity	Status	Conf.

6.6.3 Standard Approval Processes

No standard approval processes detected on CPQ objects.

6.6.4 Quote Templates

Template	Default	Last Modified
Proposal With Usage	No	Not available
unused_templates_summary	No	Not available
Quote	No	Not available
Contract	No	Not available
Proposal	No	Not available
Proposal w/ Subs and One-Time Prods	No	Not available
Proposal Multilanguage	No	Not available

6.6.5 Document Generation

7 quote template(s) configured. DocuSign integration: **Active**.

7. Usage & Adoption Analysis

⚠ **Low-volume data — results may not be statistically meaningful.**

7.1 90-Day Quoting Activity

Metric	Value	Trend	Conf.
Quotes Created	**23**	N/A	Confirmed
Quote Lines	**73**	N/A	Confirmed
Quote Modification Rate	**Not assessed — requires Field History Tracking on SBQQ__Quote__c**	N/A	Not extracted
Quote Volume Trend		N/A	Confirmed

7.2 Conversion by Quote Size

Size	% Quotes	% Revenue	Conversion	Conf.
Large ($25K-$100K)	9%	49%	100%	Estimated
Medium ($5K-$25K)	35%	42%	75%	Estimated
Small (<$5K)	52%	9%	25%	Estimated

7.3 Discount Distribution

Range	Count	% Discounted
0-5%	0	0% (0 of 7)
6-10%	0	0% (0 of 7)
11-15%	0	0% (0 of 7)
16-20%	0	0% (0 of 7)
>20%	7	100% (7 of 7)

7.4 Manual Price Overrides

0 lines (0%) with manual overrides. Revenue impact: $0.

7.5 User Behavior by Role

Role	Users	% Quotes	Conv %
System Administrator	1	100%	52%

7.6 Top Quoted Products

#	Product	Category	Quoted	% Quotes
1	2-Yard Dumpster	Commercial	7	30%
2	Application Monitoring	Software	3	13%
3	Quick Start Enablement	Services	3	13%
4	Paid Data Plan	Usage	3	13%
5	96 Gallon Residential Waste & Recycling Bundle	Residential	3	13%
6	Disaster Recovery	Software	4	17%
7	Anomaly Detection	Software	4	17%
8	High Availability	Software	3	13%
9	Clustering	Software	3	13%
10	Distributed Search	Software	4	17%

8. Data Quality & Technical Debt

8.1 Flagged Areas

Issue	Status	Detail
Products with Blank Family	**Flagged**	5 products have no Product Family assigned: Ad Hoc, Fee, Credit, Free Trial, Shipping Charge Product. Consider assigning families for better categorization.
Orphaned Quote Lines	**Clean**	No orphaned quote lines detected. Status: clean.
Duplicate Product Codes	**Flagged**	3 product codes shared by multiple active products. Status: flagged.
Inactive Products on Ordered Quotes	**Clean**	No inactive products on ordered quotes. Status: clean.
Invalid Picklist Values	**Not Assessed**	Not assessed in current scope. Requires full schema + data scan.

8.2 Technical Debt Inventory

Category	Count	Detail
Dormant Products	3	Products not quoted in the 90-day assessment window.
Inactive Price Rules	8	Price rules marked inactive. Review for cleanup.
Inactive Product Rules	1	Product rules marked inactive. Review for cleanup.
Stale/Test Rules	3	Rules with DELETE, TEST, DRAFT, or similar in name — likely cleanup candidates.
Duplicate Discount Schedules	11	1 schedule name(s) appear multiple times: "Named Users Discount Schedule" (11×).

8.3 Feature Utilization

Feature	Status	Detail
Product Bundles	**Active Usage**	76 bundle products, 475 product options.
Discount Schedules	**Active Usage**	22 schedules detected.
Custom Scripts (QCP)	**Active Usage**	5 custom scripts detected.
Quote Templates	**Configured**	7 templates detected. Usage not tracked.
Advanced Approvals	**Detected / Unverified**	63 custom action buttons detected (no advanced approvals).
Contracted Pricing	**Configured**	ContractedPrice setting enabled but no records found.
Multi-Language	**Active Usage**	1 localizations detected.

8.4 Field Completeness by Object

Field completeness analysis not extracted in current scope. Requires full schema and data scan.

10. Configuration Complexity Hotspots

Hotspot	Severity	Analysis
Quote Pricing Engine	**Critical**	20 active Price Rules + 37 active Product Rules + 22 Discount Schedules + 5 Custom Scripts (QCP) form a multi-layered calculation chain.
DocuSign Document Chain	**High**	Quote PDF generation → DocuSign envelope → signing → Order creation spans CPQ, document generation, and e-signature.
Custom Code Dependencies	**High**	67 Apex classes + 5 triggers reference CPQ objects. Code review required for full assessment.
Bundle & Option Configuration	**High**	76 bundle products with 475 product options, enforced by Selection, Validation, Filter, and Alert product rules. Nested bundle configurations increase quote calculation complexity and UI surface area.

Appendix A: Configuration Object Inventory

A.1 CPQ Configuration Objects

ID	Object(s)	API Name	Count	Complexity	Phase	Conf.
1	SBQQ__Localization__c	`SBQQ__Localization__c`	269	medium	—	Confirmed
2	Product2	`Product2`	179	medium	Phase 1	Confirmed
3	SBQQ__CustomScript__c	`SBQQ__CustomScript__c`	108	medium	Phase 2	Confirmed

Appendix C: Glossary

Term	Definition
CPQ	Configure, Price, Quote — Salesforce quoting application (SBQQ)
SBQQ	Namespace prefix for CPQ managed package objects
sbaa	Advanced Approvals managed package
QCP	Quote Calculator Plugin — JavaScript custom calculation injection

Appendix D: Extraction Coverage

Category	Coverage	Notes
Product Catalog	Full	Products, bundles, 475 options, 38 product rules.
Pricing & Rules	Full	Price rules, discount schedules, custom scripts. Price rule usage frequency: Not extracted — requires rule-to-quote linkage data.
Transactional Data	Full	90-day quotes, quote lines, usage trends.
Custom Fields & Validation	Full	Custom fields, validation rules, formulas.
Custom Code	Full	Apex classes, triggers, flows. Apex class → SBQQ object dependencies: Not extracted — requires code-level analysis.
Quote Templates	Full	Template structure, sections, content.
Advanced Approvals	Partial	Approval action buttons detected; sbaa approval rules and chains not yet extracted.
CPQ Package Settings	Full	Custom settings, plugin configuration.
Integrations	Full	Named credentials, platform events.
Order Lifecycle	Full	Orders, contracts, subscriptions.
Localization	Full	Multi-language translations, custom labels.
User Behavior	Confirmed	Derived from audit trail sampling.
